Mr, Scott Frieburger, BES, CEA, CCEP  
AET Consultants Inc.  
133 Weber Street North  
Suite 3 - 504  
Waterloo, ON  
N2J 3G9

Dear Mr. Frieburger,

This letter is in reference to the waste composition auditing work that your firm has done for us.

In 2005, AET participated in a Request for Quotation to assist our firm with some waste composition work that we were doing for Stewardship Ontario. Specifically, our role was to examine the composition of waste in public spaces in the City of Toronto. AET prepared a highly professional proposal, specifying your company's experience, and that of your team.

During the field work period, AET staff were especially helpful in working cooperatively with City staff and making sure that the waste composition work was done on time and professionally within the accepted protocols. The work was performed with the required safety precautions in place, which we deemed to be a must. Data capture and the management of the results of the audit were done in a most satisfactory manner, with the data sets delivered to us promptly and accurately.

We thank AET for the excellent service that you provided our company during this audit. The information obtained from the AET audit was very helpful to us, and to our client.

Mark McKenney, President
