To Whom It May Concern:

RE: Reference for Eco2 Systems Inc.

I am pleased to offer this recommendation on behalf of Eco2 Systems, Inc one of our audit compliance consultants. I have been acquainted with Eco2 Systems since February 2005, after they won the contract to conduct a gap analysis of the conformance of the Northstar Aerospace (Canada) Inc. Milton facility. In the scope of the contract Eco2 Systems Inc. developed and conducted an environmental compliance assessment of the Market Drive, Milton facility and grounds. The audited manufacturing facility is approximately 70,000 square feet in size.

The assessment included a review of the following aspects of the business: chemical storage and management, air emissions, water emissions, hazardous waste disposal, spill management, non-hazardous waste management, designated substance review and employee training programs. Recommendations were made to either improve compliance or to achieve Best Management Practices in specific areas. The assessment took 2 days of on-site document review and plant visit.

During that time I was able to observe Eco2 Systems' professional skills as well as their interaction with regulators and subcontractors. I found that they are committed to consistently provide superior efforts with professional end products in a timely manner and within the estimated budgets. Overall, Eco2 Systems delivered the report on time and included a presentation to management to discuss their findings. The prepared document has been a valuable continuous improvement tool for the Milton facility. In short, I would recommend Eco2 Systems for further environmental compliance work.

Should you have questions or require additional information, please feel free to contact me at (813) 205-6183.

Sincerely,

Northstar Aerospace (Canada) Inc

Ibrahim F. Ayoub, P.E.
Corporate Environmental Manager
