Dear Scott:

Re: References

Thank you for the recent audit services your company provided to the Town of Richmond Hill. We were looking to develop a base line of residential waste generation rates before embarking on major changes to our waste management programs. Three days of audits were completed for this project to determine waste generation rates while collecting recyclables every other week and to document any changes that might occur once we changed over to weekly recycling.

We found your team to be both approachable and very professional in their approach to the project. They were completely self sufficient in setting up and recording information, and we were impressed by the level of detail they went to in order to determine exact weight measurements in each of the categories.

Thank you also for providing photos of the process for our report to council. They were very helpful.

We found the services of AET Consultants Inc., to be excellent, and we would be pleased to recommend them for their waste auditing services.

Sincerely,

A handwritten signature in blue ink, appearing to read 'Jeff Meggitt', is written over a light blue circular stamp.
